

HOYT Extra-Wide Center Rubber

Nearly twice as wide protecting hook from wear.

The Hoyt Extra-Wide Center Rubber provides protection from wear like never before.

- Almost 6" wide – almost twice as wide as "standard" center rubber.
- Protects hook area from concentrated, premature wear, extending screen cloth life.
- Diverts material back into the main screening stream.
- Made from long wearing, 70 durometer rubber – the quality you expect from Hoyt.
- Comes **already cut** in 48" lengths – speeds up installation.
- Wider rubber does not reduce screening area.

Almost 6" wide
