

HOYT Serpa Screens

Superior Engineering.

The unique diamond pattern of the Hoyt Serpa Screens is specifically engineered to prevent plugging and blinding associated with certain types of aggregate. The absence of any straight wire gives this design more open area allowing material to freely flow through. Highly effective in screening light- to mid-range aggregate, this screen is custom designed for use in vibrating units. The Hoyt Serpa Screen effectively produces material that meets stringent ASSHTO and Superpave sizing specifications.

- Increased production due to plugging and blinding elimination and more open area between wires.
- Accurate sizing capability to meet high industry standards.
- Precision engineering for custom designed product.

Superior Service.

Every HOYT sales engineer is an expert in the industry and serves HOYT's customers exclusively. Our team assists each customer as an individual and can advise on the best custom solutions for greater productivity.

Cutting Edge Design – Field engineers develop design solutions to common screening problems resulting in lowered costs and heightened profitability and productivity for customers.

Continued Development – Constant dialogue with customers enables HOYT to develop products to answer individual needs and deliver the highest quality product.

Customer Service and Industry Knowledge Our customers can always depend on technical support from our sales and customer service teams. Each member is highly trained to answer questions and give professional industry advice.

Made in the USA – All HOYT Wire Cloth products are manufactured in the USA. We are proud to contribute to the health of the American tradition of manufacturing.

Diversity – HOYT's products serve a wide variety of industries from crushed stone, recycling and architectural application.
