

HOYT Serpa XLT™ Screens

Patented*, Shaped Wire Performance in a self cleaning screen.

The "XLT," in HOYT Serpa XLT™ Screens, represents Extra Life and Throughput, referring to the outstanding performance of this unique and highly efficient screen. The Serpa XLT™ utilizes shaped wire in a traditional diamond pattern to reduce or eliminate plugging and blinding:

- Especially suited to heavy deck loads. Up to 55% stronger than round wire screens
- Rapid separation of fines from prime-size material
- Self Cleaning reduces or eliminates plugging or blinding
- Much longer wear-life than traditional self-cleaning screens.
- Tremendous production increases

What makes the difference?

HOYT Shaped Wire™

With shaped wire more particles deflect down and through the screen. Fewer particles deflect up and over. Just what you want and Production Increases!

Competitor's Round Wire

Particles are able to deflect up and over more easily causing less production. Material hitting wire at this angle bounces back at the same angle. What a waste...
